# Abstract

**VISIONARIA** is a Business Hub that makes investments in several sectors to create and launch **AMZcoin**, and provide funding assistance for multiple projects to exploit the fast growing SaaS [ Software as a Service]. The “Subscription Economy” first promulgated by Zuora Founder and Chief Executive, Tien Tzou, is now recognised as being key to gaining more customers . Changing the historically based product first to customer first mind-set is the way forward for every business model.

# Introduction

The global trend of digitisation in business is now one of the most critical features in SaaS and Subscription Business strategy. Business models form the basis by which to evaluate customer requirements, how to manage costs while add or create items to improve business.

Traditional Business Models and online shopping platforms providing a linear structure to customers have evolved, shifting to Hybrid Business Models using Financial Technology to incorporate crypto decentralised payments on the blockchain. Amazon, Apple, Facebook, and Google have become synonymous with the gear change and shift from linear to the more profitable multi business or hybrid platform, offering more customer value and, therefore, more investment opportunities for stakeholders.

## PROBLEM

Platform Business Model built on traditional internet technology set up a site to sell goods from one or more manufacturers. The owner of the platform had either invest in part in the manufactured items or gain the trust of the manufacturer to place items for sale on the platform. The only way for this site to survive is to provide enough customers and new users, to keep the wholesalers happy and maintain a steady supply of goods.

This business model has one major flaw; the different parties involved often have no stake in the products, and the model is merely a marketing tool such as that of Uber, EBay and others.

### SOLUTION

Hybrid Business Model, best described as a platform where companies invest in their customised products, but also in building a more significant client base by extending their ecosystem to include other diverse or related companies via API.

For example, Apple hosts many of its brand software Apps and hardware such as phones, watches and more, but includes many other company apps that have been developed using iOS.

Visionaria has collaborated with multiple companies not only to spread the risk and costs but also to take advantage of the diverse group of customers visiting a single platform to guild a more significant investor and customer base.

Revenue increases through third party information sharing, thereby broadening the customer mix on an infinite level.

Increased Revenue with Hybrid Business Platforms comes through different sources that are now more diverse because of third party exposure:

- ✓ Increased Lead Generation leading to more customers/sales
- ✓ Revenue Sharing Partnerships and Affiliates
- ✓ Variable Fee Structures
- ✓ Pay for Use/View

# Visionaria Hybrid Business Hub

VISIONARIA has identified several entrepreneurial projects that require promotional funding in order to reach the wide international audience. The ICO will launch AMZ coin as a long-term investment strategy to raise funds for the macro ecosystem.

In order to be a major advocate in the media and for AMZcoin and Visionaria to become synonymous with philanthropic projects providing financial assistance to those in need and provide a better standard of living. Additionally the members of the Visionaria funding group are working towards sustainable growth with greatest visibility to a maximum number of investors and customers.

The AMZ coin brings new EOSIO software technology through the Block.one ecosystem, making it one of the fastest, most scalable and easy to use blockchain foundational platforms in the world.

AMZ Coin tokens align your euros with your values. The currency will support projects that will undoubtedly revolutionize its areas of activity.

## Current Projects:

-  **MONTTRA** - The Anti-Counterfeiting Solution
-  **AMAZING HISTORY** - The weird and wacky stories channel
-  **COLLUBUS** - Trading up – Fees Down
-  **ALLABOUTCRYPTO.TV** - Making sense of blockchain and cryptocurrency
-  **EIDOLON** – From dreams to reality
-  **DONATION DISTRIBUTION SHARE** – Charity above all
-  **OBT LIVE** – It's up to you

# AMZ Coin

**VISIONARIA** will launch AMZCoin to kick start the ICO. The funding from this ICO covers the marketing and development business costs. The coin will evolve as a cryptocurrency with wallet structures to form a method of payment and receipt by different users on the specific platforms owned by Visionaria.

The initial **AMZCoin** utilises EOS token to take advantage of the diverse set of benefits within the EOSIO community. This will expand the AMZcoin ecosystem with the creation of its own blockchain on the scalable base technology that links the framework of the diverse set of Visionaria businesses and thus, create a UTILITY COIN used in innovative technological projects for the benefit of users and stakeholders.

**We will issue our Token Coin – AMZCoin, with a strict limit of 240,000,000 (240 million market cap) – The number of AMZ Coins will never be increased.**

# AMZ Coin Technology

EOSIO is now one of the most used blockchain software protocols in the world and offers dApps operating systems. The EOSIO apps are finding more users due to the cheaper, faster, and safer offerings than any of the other platforms, and gives developers and entrepreneurs the ability to process thousands of transactions per second with minimum fees and confirmation times.

The operating system comes with real benefits in many economic fields – from sharing music and videos, digital payments, fitness and health tracking to calling a cab, and many more.

There continues to be a vigorous argument over the mass use of blockchain, but there is no doubt that this highly anticipated technology will improve the way business, manage vast data resources, and share information on the internet. While the debate lingers, the progression continues, and there is little to stop blockchain becoming the new foundational platform for the global web ecosystem.

EOSIO has made massive strides in the future of blockchain by providing the solution to the main problems of cost, speed, scalability, and sustainability.

# AMZ Coin Utilisation

## PROJECT ADVERTISING & MARKETING BUDGET

To fund and anchor the project, a budget, 10 million coins, is reserved for marketing, it will begin on January 2020. Allocated monthly over 100 months at 100,000 AMZ Coins per month.

## PHILANTHROPY AND PROJECT FUNDING ASSISTANCE

An allocation of 10 million AMZ coin over 20 years: Annual funding (every 365 days) equal to 500,000 with fiscal and coin value increasing annually. It will begin on December 2020.

## MANAGEMENT & SHAREHOLDER COIN ALLOCATION

A five-year budget has been set up to manage HR and operating costs, which include implementation of blockchain technology within the EOSIO operating platform utilising DAPPS.

- 🕒 **Shareholder Advantages** – 5 million coins allocated to reward Amazing History shareholders who purchase 100 Euros worth of shares purchased before 30th June. Undistributed coins during this period will be automatically burned.
- 🕒 **Management Team** - 10 million coins unlocked at 1 million biannually over five years. The first million will be unlocked in January 2020.
- 🕒 **Staff and Operating Costs** - 10 million coins will be utilised on demand.

\*\*The management team will use only the minimum amount of coins from the ICO to offset management costs and will not interfere with currency deflation.

\*\* Staff members will be hired on an hourly basis and paid from the allocated budget of 10 million coins.

## AMZ TECHNOLOGY

To implement cryptocurrency within the EOSIO operating system, the dApps (decentralised applications) technological feature is used to support applications and transactions. Funding for this technology is allocated with drawdown on 10 million coins.

## AMAZING HISTORY SHAREHOLDER ADVANTAGES

- ① 5 Million AMZ coins have been allocated to facilitate a Shareholder Reward: 5000 additional coins will be distributed to each new shareholder who invested 100€.
- ① The reward program lasted until June 30th of 2019 after which time undistributed coins will automatically burn.

## INVESTOR STAKING

# MONTTRA Anti-Counterfeit System

## **GUARANTEE OF PRODUCT AUTHENTICITY**

An advanced anti-counterfeiting technology prevents counterfeit products from entering the market via the distribution chain.

Montra guarantees the genuineness of the products in its database, offering consumer safety. From producer to final consumer, the entire route through the distribution chain is automatically analysed, preventing counterfeit goods from entering the retail market.

## **ABOUT MONTTRA**

Among other innovative features, it monitors the process of ownership transfer by ensuring the producer is able to track online all items produced by them in the distribution circuit and promotes active consumer participation.

## **PRINCIPLES OF OPERATION**

The system provides a specific item label with unique serial number and hidden code, covered by Scratch Card Ink (similar to a scratch card).

Transfer of ownership via the app or web goes through a validation process between each link in the chain ; from producer to operator and between the operator and the end user. Transfer of ownership via the app or web goes through a validation

process between each link in the chain ; from producer to operator and between the operator and the end user.

### **MONTRRA LABEL OF AUTHENTICITY**

The process of transfer of ownership begins with the Montra authenticity tag or serial number, which is integrated into the product at manufacture stage and before it enters the distribution chain. The end user is then able to scratch the label to ascertain whether the item is authentic as per the registered serial number.

Should the code be visible (not covered by the scratch label) the responsible consumer (end user) must reject the product as not original and therefore counterfeit. The app provides for customer rejection, which is relayed to the product retailer and the original producer.

# ALLABOUTCRYPTO.TV

## Making Sense Of Blockchain & Cryptocurrency

In the rapidly developing world of cryptocurrency, this tradeable asset and payment structure, even has a dictionary definition.

Definition of cryptocurrency: any form of currency that only exists digitally, that usually has no central issuing or regulating authority but instead uses a decentralized system to record transactions and manage the issuance of new units, and that relies on cryptography to prevent counterfeiting and fraudulent transactions.

REF: [HTTPS://WWW.MERRIAM-WEBSTER.COM/Dictionary/CRYPTOCURRENCY](https://www.merriam-webster.com/dictionary/cryptocurrency)

Many people are still unaware of the value of crypto and do not yet realise that it is definitely here to stay. Forget Bitcoin, which was the first crypto to hit the internet as a method of payment and trade back in 2008. The coin is still making waves, but BTC is not what we are talking about because the coin's original use has been outstripped as a method of payment and it is now more a tradeable asset.

However, the consensus mechanism of blockchain is what started the ball rolling, and now software applications have taken centre stage in the march to progress and the future of cryptos as the only way forward.

**We want to answer the questions people ask:**

What is Cryptocurrency?

How is Cryptocurrency sent and received?

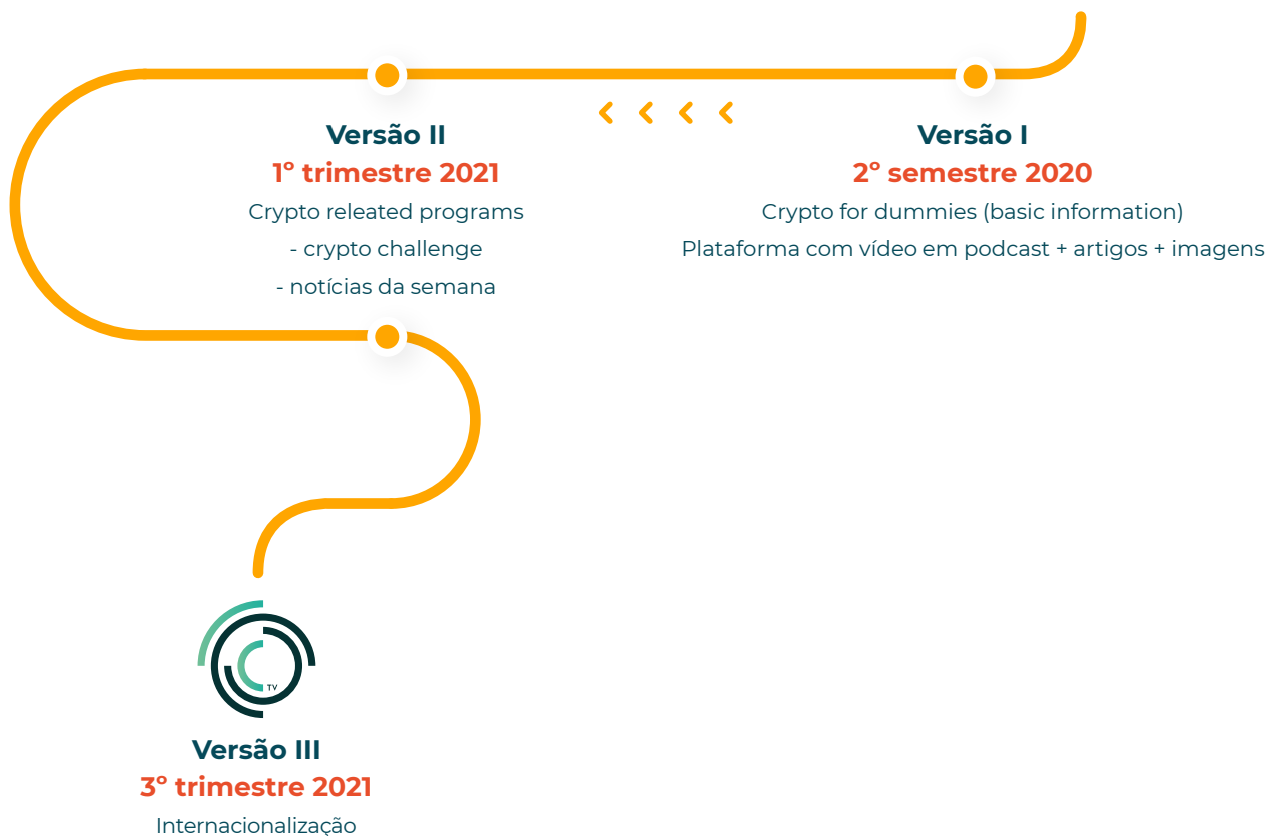

What is Cryptocurrency Mining?

What is the Purpose of Cryptocurrency?

What are the Advantages and Disadvantages of Cryptocurrency?

**ALLABOUTCRYPTO.TV** will get subscribers into the real world of cryptocurrencies where they can view discussions by professionals and chat to other subscribers and fans and share their experiences and knowledge on all FinTech developments.

# EIDOLON

## From dreams to reality

### WHAT EIDOLON DOES

EIDOLON is your opportunity to present your great idea to potential investors. VISIONARIA is launching not only a place for you to put your ideas forward but to make a pitch on OBT Live to get more coverage and more customers.

### WHAT YOU DO

Great Product: start developing a good idea into a great product

Sell Your Product: Using Social Media or EBay – good customer feedback will let investors know that your product works well.

**Bottom Line:** Make sure you have covered all the costs in a well presented cash flow document and attach as many images of your product to help get the message across to potential investors.

#### **There will be questions, be ready and able with good answers:**

What does your product do- why is it unique?

How much capital do you require and how much equity will you give investors?

Do the figures add up – production costs, plus, sales costs, selling price, expected profit.

What are production lead times – how quickly can you make and sell your products?

Your Investor Sales Pitch – KISS (keep it simple stupid) and make it interesting in a five minute sales video to put forward on OBT Live.

**Check out the most successful sales pitch to Shark Tank Investors for one of the best products of all time:**

# DONATION DISTRIBUTION SHARE Charaty above all

**Donation & Distribution Share** is the funding arm for Visionaria. We research many areas where there is a need for intervention around the world to identify the most pressing and urgent cases, where your donations and volunteer assistance will make a difference to the lives of millions of people.

## PROBLEM

HIV Aids is still one of the leading causes of poverty and mental illness in Africa. We have a staffer who works closely with several sectors and NGOs operating in Zimbabwe, and the feedback is quite shocking in a country where the educated population is the highest on the continent.

The economic situation caused by the ruling party since 1981 is probably the major contributing factor in the upsurge of HIV Aids due to the collapse of the formal employment sector; people are out of work, leaving women and underage boys and girls to earn a living in the oldest profession - prostitution!

The stigma of catching HIV Aids leads to these vulnerable people being outcast by their families; many of them women with children, leaving them even more exposed and defenceless, which leads to depression and in the most severe cases, suicide. The burden of carer for orphaned children now rests with NGOs because there is no operational government facility able to cater fully to the needs.

### SOLUTION

Lao Tsu said that if you give a hungry man a fish, you feed him for a day, but if you teach him how to fish, you feed him for a lifetime

To assist people in need and give them a better future, it has become imperative to teach those skills to look after themselves.

The Zimbabwe project aims to give those in need a safe environment for women and children to attend counselling and child welfare clinics. Also, a formal agricultural programme where guidance in the growing of cash crops, which can be sold and also provide a nutritionally balanced diet and help stem the rapidly increasing number of deaths due to starvation and malnutrition.

Besides, the centre will provide retroviral drugs to treat HIV aids and psychiatric medication to treat people who have been let down by the Department of Health in the country.

Working with DDH, you can become a partner in giving desperate people something to live for.
